

Chadwick Timbric (*chadwick.timbric@gmail.com*)
Enterprise Backend Software Developer (*code author*)

Lessons Learned → Recently + Over Time

- Be Nice → Each team member offers irreplaceable and unique value.
- Be Excited → Each team member enjoys solving problems.
- Be Supportive → Team Output \geq sum(Individual Outputs)
- Be Professional → Team members are colleagues.
- Be Responsible → Teams collaborate to synchronize deliveries.
- Be Customer Focussed → Customer joy and satisfaction rules the day.
- Be Business Minded → Executive officers conduct the orchestra.

Skill Matrix (on-the-job)

Skill	Total → New + Old
<i>Design Patterns</i>	20 → 15 + 5
<i>Microservices</i>	10 → 9 + 1
<i>Amazon Web Services</i>	15 → 9 + 6
<i>Spring Boot</i> (REST, SOAP)	4 → 3 + 1
<i>Test Driven Development</i>	20 → 15 + 5
<i>Behavior Driven Design</i>	2 → 2 + 0
<i>Document Driven Design</i>	10 → 8 + 2
<i>Unit Testing</i> (JUnit, Mockito, Gerkin, Cucumber, Wiremock)	20 → 15 + 5
<i>Postman, Curl, Httpie, `jq`</i>	15 → 12 + 3
<i>Github, Bitbucket</i>	15 → 12 + 3
<i>Nexus, Artifactory</i>	15 → 12 + 3
<i>Single Sign-On</i>	4 → 2 + 2
<i>Open Source Gateway Initiative</i> (OSGi)	3 → 2 + 1
<i>Reactive eXtensions</i>	10 → 8 + 2
<i>Network Bulkheads</i>	10 → 8 + 2
<i>JSON, YAML, XML</i>	20 → 15 + 5
<i>JEE / J2EE</i>	20 → 15 + 5
<i>Relational Database / SQL</i> (Oracle, PostgreSQL, Maria/MySQL)	25 → 15 + 5
<i>NoSQL</i> (Cassandra, Mongo)	10 → 8 + 2

Messaging (SQS, Rabbit, Active-MQ)	$20 \rightarrow 15 + 5$
Encryption (OAuth, H2-MAC, NTRU, XOR)	$20 \rightarrow 15 + 5$
TCP, UDP, Networking (Wireshark, TCP Buffer)	$21 \rightarrow 20 + 1$
RPC (Finagle, Protobuf, RMI, CORBA)	$20 \rightarrow 15 + 5$
Kotlin	$7 \rightarrow 6 + 1$
Scala	$3 \rightarrow 3 + 0$
Java 11+	$6 \rightarrow 5 + 1$
Java 8	$10 \rightarrow 8 + 2$
Java pre-8	$15 \rightarrow 12 + 3$
IOS (Objective C)	$1 \rightarrow 1 + 0$
Adroid	$1 \rightarrow 1 + 0$
ECMA Script, Javascript	$20 \rightarrow 15 + 5$
Unix, Linux	$30 \rightarrow 5 + 25$
Amber, Bash, Zsh, Tmux, Mosh	$20 \rightarrow 12 + 8$
Git, Svn, Mercurial, CVS, SSCS	20
Agile, Scaled Agile, UP, RAP (UML)	15
Jenkins, Bamboo, Pipelines	12
Atlassian Tools (Jira, Confluence)	12

Behavior / Personality

- Humble
- Collegial
- Cooperative
- Professional
- Responsible
- Customer Focussed
- Business Delivery Centered

Overview

A senior enterprise backend software developer passionate about great code. I write mission-critical system backends across many business domains, financial, transportation, telecommunications, e-commerce, defense, etc. Starting at Sun Microsystems, Inc. I assisted their clients in system architectura

and methodology, but especially in JEE code quality.

Recently at Amtrak, PayPal, Tendril, Charter Communications, JDA Software Group, I coded Web Services and large data processing optimizing read response time and scalability (#of concurrent requests/second).

Profile Image

Software Architecture

- The C4 Model – Context, Containers, Components, Code: <https://c4model.com>

Code Examples

- Finite State Machine: <https://github.com/chadwickboggs/fsm>
- Cryptography: <https://github.com/chadwickboggs/crypto>
- Spring Boot: <https://github.com/chadwickboggs/xchange>

Professional Experience

2/2023 – 4/2024 Software Developer, Amtrak (*consulting*)

- Primary code author (30k+ lines of code) of their AWS rewrite of their entire outbound email system for customer purchases including trip information and sales receipts. Sales receipts and trip information listings for all Amtrak trips, with add-ons, and purchase types, across all Amtrak stations, passenger classes, and third-party carriers.
- Features included the handling of and processing scale for all Amtrak customer purchases, the publishing of business metric, system metric for observability, error / failure alerting, meaningful trace, debug, info, warn, and error logging with security and PII protection.
- Technologies included AWS (Cloud Formation, Lambda, Event Bridge, SQS, S3), Immutables.org Java Beans, REST, JSON + FasterXML Jackson, HttpClient, environment specific configuration, environment variables, Java 11, Maven.

6/2022 – 1/2023 Senior Software Engineer, Global Healthcare Exchange (GHX)

- Lead team authoring software connecting hospital ERP and medical equipment purchasing systems to GHX.
- Used AWS EC2, SQS, S3, and Lambdas, Java, Oracle.
- Web Services, FTP, sFTP, HTTP(S), JSON serialization/deserialization, SQL.

- Deployed in 100's of customer data centers, two week release cadence w/ prod deploy.

2/2020 – 5/2022 Software Developer, PayPal w/ TCS (*consulting*)

- Implemented direct deposit signup services in Spring Boot.
- Implemented account bank migrations, bank change, for all PayPal accounts in Spring Batch.
- Maintained and implemented feature enhancements to a batch merchant report generation system.

1/2019 – 10/2019 Software Engineer, Arris/Commscope (*consulting*)

- Updated the video catalog and merchandising backend originally authored by Motorola for Bouygues Telecom, France.
- Java EE, WildFly, GlassFish, WebSphere, REST, Wiremock, Mockito, Postman, Wireshark.

1/2018 – 4/2018 Software Engineer, Comcast, Corp. (*consulting*)

- Updated one Java system to Docker/Kubernetes, Java 11, Cucumber, Reactive Extensions, Git.

1/2016 – 12/2017 Software Engineer, Charter Communications. (*consulting*)

- Maintained 100+ Java micro-services, added new micro-services all in Amazon Web Services.
- Linux, Netflix OSS, Cassandra NoSQL, Reactive Extensions, Java 8, SQS, SNS, S3, EC2, Active MQ, Mongo, Git, Spring.

9/2014 – 2/2015 Software Engineer, Comcast, Corp. (*consulting*)

- Designed and built “RxJDBC,” a Reactive Extension, RabbitMQ Message Oriented Middleware (MOM) front to an Oracle database as part of the Resiliency Project, Java, Git.

2/2014 – 5/2014 Software Engineer, Tendril, Inc.

- Back-end dev-ops programmer on SOA Finagle+Protobuf+Cloud Java/Scala micro-services.
- Atlassian, Cucumber BDD, PostgreSQL, Hadoop, Hibernate, Scala, IntelliJ IDEA, Git.

2/2010 – 12/2013 Senior Software Engineer, JDA Software Group, Inc. which merged with RedPrairie, Corp. formerly StorePerform, Inc.

- Project Lead for integration of iOS, Android mobile task system with legacy web-based system
- Tasks roughly are E-mail messages enhanced for distributing and tracking business actions.
- Customers included Fortune-500 companies. Scalability, performance were significant.
- Technologies: OSGi, Gradle, Git, and Sql Server, Git, Mercurial, Subversion, CVS.
- Extended and maintained legacy J2EE web-based task management system.

1/2008 – 12/2009 Independent Software Development Consultant & Sun Java Consultant

- Extended and maintained a JEE merchandise inventory system with MySQL DB, Java, Spring.
- Customers: AmDocs, Etilize, Bell South, eBay, Frontier Airlines, Skyway

2/2007 – 12/2007 Chief Operation Officer, Evolution Hosting, Inc.

- Viawest data center Linux servers for J2EE applications with Java management software, Java, Linux, VMware, Zen, Amazon Web Services.
- Large number of customers including Crocks, Wells Fargo, and Hunter Douglass, among others.

2/2004 – 1/2007 Independent Software Development Consultant & Sun Java Consultant

- Created NIO client with could reach 100 Mb/s scale message rates.
- Created new web sites, Java.
- Consulted at eBay, Frontier Airlines, Bell South, Skyway representing Sun Microsystems, Inc.

2/2002 – 2/2004 Senior Software Architect, Pack-expo, Inc.

- Created a reporting systems for packaging advertising services.
- Maintained packaging advertising web site.
- Technologies: JBoss, Linux, MySQL, Intelli-J, BeanShell, JSP, Lzop'ed data stream for large DB backups over NFS mounts, Java, Groovy.

2/1999 – 1/2002 Java Consulting, Sun Java Center, Sun Microsystems, Inc.

- Represented Sun for RUP, UP, SunTone, OOA&D mentoring and J2EE coding, Java, SCCS, Teamware, RCS, Solaris, Java.
- Consulted at Citigroup, Vanguard Fiduciary Trust, Credit Suisse.
- Performed an Architecture Assessment recommending SOA and JEE which later was followed as advised.

4/1998 – 1/1999 Java Developer, Sun Educational Services, Sun Microsystems, Inc.

- Created web-based and Swing computer assisted training systems.
- Improved the performance of our custom pseudo-recursive-descent parser template engine by adding caching of parser results and by altering the parsing algorithm.

Education, Certifications, Patents

- AWS Certified Developer (*in progress*)

- Sun Certified Java Developer
- Sun Certified Java Programmer
- Patent: #6907423 Search engine interface and method of controlling client searches
- B.S. Computer Science, University of Colorado at Boulder
- Attended the United States Military Academy at West Point
